INNOVATIVE FLUSH TECHNOLOGY
Geberit Rimfree® toilets are equipped with a specially developed and patented flush guide which ensures a targeted and hygienic flush every time.

Rimfree

CLEANLINESS EASY TO CLEAN: **RIMFREE®**

Keeping the bathroom spotless is a must, because cleanliness and hygiene are so important, especially in the bathroom. Most people want to avoid harsh chemicals and no one wants cleaning to be a hassle. This is why Geberit have introduced the Rimfree® toilet so there are no more hard to reach places.

Rimfree® has a completely new and patented flush technology. The flow of water is controlled just before it reaches the ceramic pan – the flush guide sends the water stream along both sides to the exact area where it is needed for a clean and thorough flush.

www.geberit.co.uk

↑
Common toilet pans depend on a flush rim which cannot easily be cleaned. Dirt and bacteria accumulate in this difficult to reach place resulting in unpleasant odours.

↑
With the Geberit Rimfree® technology however, there is no rim. The smooth inner surface of a Geberit Rimfree® toilet pan can be cleaned with one swipe. And best of all, one can see immediately if all dirt has been removed.

COMFORT CLEANLINESS AT THE TOUCH OF A BUTTON

Geberit has spent the past 40 years continuously fine tuning the shower function and spray, the centrepiece of any shower toilet, to absolute perfection. At the same time, we have invested into developing innovative technology and comfort functions, making our shower toilets the market leader. Depending on the model, a host of features make for a truly pampering experience.

DUOFRESH

MODULE

UNPLEASANT ODOURS IN THE TOILET ARE A THING OF THE PAST

It is completely normal to have an extractor fan over a hob in a kitchen to remove unpleasant odours and now the same principal is available in the bathroom.

The Geberit DuoFresh module removes the bad air directly from the toilet and purifies it using a ceramic honeycomb filter and then returns it to the room. This is extremely effective, as it prevents unpleasant odours from spreading throughout the bathroom in the first place, rendering air fresheners, lighting matches, opening windows completely unnecessary. Thanks to a proximity sensor, the odour extraction always switches on automatically as soon as someone sits down on the toilet. The odour extraction is therefore also a great idea for guest bathrooms. In addition, an LED orientation light and the insert for in-cistern sticks can also bring you added comfort. The Geberit DuoFresh module can be easily installed in any Geberit Sigma cistern and can be combined with almost any flush plate plate from the Sigma range.

FOR WASHBASIN AREAS WITH STYLE AND STORAGE SPACE

The calm, understated design of the Geberit VariForm washbasin cabinets gives the washbasin area a sense of lightness and perfectly complements the lean, modern design of the washbasins. The modular system permits flexible planning tailored to the space. The narrow washbasin cabinet has widths of 75 and 90cm, each with one drawer. The elements are additionally available as a set with a low cabinet of the same construction height or in an L-shape with a larger low cabinet. If even more storage space or two washbasins are required in the bathroom, different combinations can be created according to design preference. The furniture comes in a wide range of colours; white high gloss coated, lava matt and hickory, and therefore blends in harmoniously with a wide range of styles.

GEBERIT ICON WASHBASINS

THE GEBERIT ICON WASHBASINS ARE DEFINED BY CLEAR, GEOMETRIC LINES ALONG THE OUTER CONTOURS

This flexibility in room design is a unique opportunity to combine sanitaryware, furniture and illuminated mirrors. The spacious inner washbasin design adds depth, whilst bathroom items are offered generous storage on the asymmetrical self space.

GEBERIT ICON BATHROOM FURNITURE

AN EXTENSIVE MODULAR FURNITURE OFFERING

Through modular, flexible combinations, the Geberit iCon storage concept inspires individuality and creates flawless beauty and order. The product diversity afforded by the Geberit iCon bathroom furniture series enables modern room planning and installation from symmetrical to asymmetrical combinations.

The drawers for the Geberit iCon washbasin, as well as the tall and side cabinets are fitted with a soft closing mechanism. The various Geberit iCon illuminated mirrors and shelves not only offer generous and practical storage space, but also create the basis for a unique and effective room design.

GEBERIT ICON ILLUMINATED MIRROR ELEMENTS

Three illuminated mirrors from the Geberit iCon series radiate pleasant, soft light at the washbasin. Depending on requirements, the horizontal light strips placed above the mirror can be offset to the left or right; the shelves can also be centred or side mounted. This creates interesting highlights in the room and visual connections with side and tall cabinets. The Geberit iCon illuminated mirrors are available measuring 37, 60, 90 and 120cm in width and 75cm in height.

CLEAR DESIGNS, SLIM CONTOURS, GENTLE CURVES

The washbasins from the Geberit Acanto bathroom series are presented in a timelessly modern soft organic design, with clear geometric contours and organically shaped inner basins. They are available in different variances as standard, slim or compact basins in different sizes. Geberit is meeting the desire

for attractive, modern and individually designed bathrooms. The SlimRim design gives washbasins a particularly elegant, slender appearance. The standard washbasins are available with and without shelf surface or with short projection for en-suites and guest bathrooms.

GEBERIT ACANTO BATHROOM FURNITURE

FURNITURE TO EXPRESS YOUR INDIVIDUALITY

The Geberit Acanto bathroom furniture offers freedom of design and functional excellence. Following extensive tests with customers, the series has been ergonomically designed to meet the widest variety of everyday needs. The inside of the furniture is surprisingly flexible, with the arrangement of the drawers, compartments and shelves creating an uncluttered environment. A magnetic board, which can be mounted on the wall, enables storage trays or brackets to be attached precisely where the cosmetic items are needed. The innovative design concept transforms the mirror cabinet above the washbasin into a

focal point with a built in magnifying mirror offering greater versatility.

With a wide range of washbasin cabinets, tall cabinets, mirror cabinets and shelf solutions, the Geberit Acanto bathroom furniture creates the perfect storage space for every bathroom. The furniture is available in four colours; lava, sand grey, white and black.

The designers of the bathroom furniture placed a particular emphasis on a modern combination of different materials and surfaces such as glass, metal, painted and wood finishes, not to mention the individual composition of the different furniture types.

GEBERIT XENO² WASHBASINS

Minimalist and superior in design, convenient and versatile in function.

As an expression of the natural clear lines, Geberit Xeno² washbasins have a slightly raised tap hole bench with a narrow platform to the edge of the basin. The absence of overflow holes means that the aesthetics of the inner basins flowing forms are not disrupted. The clear design statement also offers advantages when it comes to hygiene and ease of cleaning.

SLIM LINES FOR EXCLUSIVE WASHBASIN AREAS

Geberit Xeno² washbasins made of the solid surface material Varicor® stand out due to their particularly slim rim. Together with the matching bathroom furniture, they create highly exclusive bathrooms featuring washbasin areas that are spacious while at the same time boasting a lightweight appearance. Fascinating details such as an integrated light strip underneath the washbasin provide interesting highlights.

GEBERIT XENO² BATHROOM FURNITURE

AN ELEGANT LINE WITH CLEVER DETAILS

The elegant Geberit Xeno² bathroom furniture follows the geometry of the ceramic, creating a minimalistic bathroom ambience. Sophisticated furniture fronts lend the series to a naturally lightweight appearance. The handle free washbasin cabinets underline the minimalist design with a functional push to open mechanism that ensures ease of use. The furniture provides generous storage space, with practical features such as anti-slip mats and clever arrangement systems for bathroom accessories. Integrated LED lighting ensures a perfect view inside the upper drawers.

ELEGANT GLASS COVER PLATES

Glass cover plates underline the elegant look and provide lasting surface protection for washbasin and side

cabinets. Convenience meets precision in the 170cm tall cabinet. Highlights include variable glass shelves, a large internal mirror, integrated profile handles and a convenient soft closing mechanism. The cabinet for handrinse basins and the tall cabinet are available with right hand or left hand doors.

GEBERIT XENO² ILLUMINATED MIRRORS CREATE AMBIENCE

Matching illuminated mirrors with LEDs follow the strict geometry of the Geberit Xeno² series. Available for all Xeno² washbasins in widths from 40 to 120cm, they allow the washbasin to take centre stage with atmospheric, indirect light. When applying make-up or shaving, direct lighting from above can be activated via a sensor switch with a dimming function. For a clear view at all times, anti-mist heating is available for the mirror surfaces.

Hidden overflow

KeraTect®

Symmetrical lines frame gently rounded inner basins and provide generous space for washbasins. A perfectly designed and specially developed, ceramic waste cover is seamlessly incorporated into the basin design. Nothing can disrupt the aesthetics of the washbasins, as they are designed without an overflow hole, which is made possible by the patented Geberit washbasin connector Clou.

GEBERIT **ONE**

GEBERIT ONE

Geberit ONE combines Know-How in sanitary technology with design expertise, presenting a pioneering, fully integrated and comprehensive solution for the entire bathroom. This is made possible by integrating many components behind the wall. Cleverly combined in a single system, Geberit ONE has the chance to demonstrate its many benefits, both obvious and hidden. This means greater cleanliness, more space and greater flexibility in the bathroom. **Functional design for a better quality of life.**

NICHE STORAGE BOX
The interior of the niche storage box is designed to prevent water and dirt residues, as water cannot accumulate and flows unimpeded from the box.

MIRROR CABINET
Mirror cabinet with discreetly integrated lighting.

FLUSH PLATE
Geberit Sigma50.

SHOWER DRAIN
The shower drain is integrated in the wall.

TAP
The wall mounted tap ensures that the entire washbasin remains free. This means surfaces where dirt and germs can accumulate commonly in the area around deck mounted taps are prevented.

WASHBASIN
One of the highlights of Geberit ONE is the washbasin drain. As it is cleverly positioned at the back edge of the bowl, it is not directly in the water jet's line of fire, thus impeding the formation of limescale and water residues.

TOILET
When the toilet is flushed, TurboFlush ensures that the water flows laterally into the ceramic appliance and spirals through its interior. Thanks to the optimised way in which the flow of water is guided, the flush is not just very quiet, but also extremely thorough.

GEBERIT ONE WASHBASIN AREA

Hidden ceramic
overflow system

KeraTect®

Thanks to its functional design and clever features the washbasin area is the focal point of the bathroom with Geberit ONE.

The Geberit ONE washbasin ceramic appliance has two models, a floating design or for installation with furniture. It is available in four sizes and has a depth of 400mm, it takes up very little space and wall mounted taps give a sleek finish. The cleverly positioned wash basin drain also contains clever features for easy cleaning and maintenance.

GEBERIT ONE WASHBASIN CABINET AND MIRROR CABINET

THE SURPRISING SPACE SENSATION

Geberit ONE washbasin cabinets have a depth of just 400mm and come in a variety of widths. They boast an impressive amount of storage space that even dwarfs that offered by conventional models with a standard depth of 480mm. This phenomenal spaciousness has been realised by shifting the washbasin trap to the function box inside the prewall. The washbasin cabinets are available in two colours, a walnut real wood veneer and white high gloss coated.

The mirror cabinet is not just integrated into the prewall due to aesthetic reasons, but also due to practical considerations. Thanks to its barely visible projection, the Geberit ONE mirror cabinet which is available in four sizes disappears behind the wall, giving every bathroom a feeling of spaciousness. The fact that the matt finish on the rim of the mirror renders fingerprints invisible is another useful detail, and one that saves on the occasional quick cleaning job.

GEBERIT ONE TOILET

The wall-hung Geberit ONE toilet is both elegant and perfectly proportioned. The asymmetrical, completely rimless inner geometry of the ceramic pan ensures an outstanding and ultra-quiet TurboFlush. Thanks to the sophisticated installation technology, the height of the toilet can be flexibly adjusted without needing to open up the prewall, even years after being installed. The design of the toilet seat means it can be removed easily for cleaning.

GEBERIT ONE SHOWER SOLUTIONS

When it comes to the shower area, Geberit is able to meet many different demands. The floor even model is proving particularly popular. The integrated Geberit niche storage box not only saves space, but is also designed to prevent water and dirt residues.

**HYGIENIC, CLEAN AND SIMPLY BEAUTIFUL:
GEBERIT SHOWER CHANNELS OF THE
CLEANLINE SERIES FOR FLEXIBLE
BATHROOM DESIGN**

Geberit CleanLine breaks new ground in shower drainage. It does not discharge the water invisibly in a channel but instead via elegant stainless steel collector profiles. There are no hidden areas meaning that dirt is prevented from accumulating and leading to unpleasant odours. Simply wipe over the profile once and everything is clean.

Geberit CleanLine is considerably more flexible than many other shower drainage solutions as the collector profile can be simply cut at both ends and adjusted to the nearest millimetre depending on the room conditions.

GEBERIT WALL DRAIN FOR SHOWERS

TAKING THE FLOOR EVEN SHOWER A STEP FURTHER

The Geberit wall drain shifts the drainage of floor even showers from the floor to behind the wall. Not only does this look very attractive, it also makes it easier to install a floor even shower. Both the drinking water and waste water installations are behind the wall and the floor can be tiled throughout. This also makes it possible to install underfloor heating without interruption.

All that remains visible is a small cover on the wall that can be easily removed to clean the comb insert behind. The cover is available in various surface finishes and can also be tiled to match the design of the wall.

ODOUR EXTRACTION

FRESH AIR FOR EVERYONE

PULL THE FLUSH PLATE ASIDE, INSERT THE STICK, THEN CLOSE THE PLATE

That's how easy it is to ensure weeks of hygienic freshness with the insert for in-cistern sticks. The optional insert is suitable for most Geberit flush plates in the Sigma range and can even be installed by a plumber at a later date. It guides the in-cistern stick down a chute to a fixed position below the surface of the water in the cistern. Once there, the stick dissolves slowly and ensures hygiene and cleanliness in every flush throughout the entire toilet ceramic appliance, as well as providing a fresh fragrance.

ACCESSIBLE
The ceramic honeycomb filter and insert for in-cistern sticks can be easily accessed via the flush plate.

←
It doesn't get any simpler than this: pull the flush plate aside.

←
Place the in-cistern stick into the insert behind the plate.

←
Close the plate and enjoy the freshness with every flush.
