

A photograph of a person's feet wearing brown shoes, standing on a green duckboard mat. The mat has a circular pattern of raised bumps. A yellow safety line is visible on the floor. In the background, a blue pallet jack is partially visible. The image is overlaid with a black triangle in the top right and a yellow triangle in the bottom left.

Jaymart

**Anti-Fatigue
&
Duckboard
Matting**

Jaymart

Stand...

Jaymart's range of anti-fatigue matting is the best way of keeping both your employee's and your profits in good condition.

There is plenty of evidence of the tiredness, pain and other physical problems that standing still for a long time can inflict on various parts of the body; so Jaymart's anti-fatigue matting has been developed to encourage foot movement in people who for whatever reason find themselves standing up for extend periods of time.

When people shift their feet they expand and contract their leg muscles, keeping the blood circulating in their legs and feet, and greatly reducing their chances of suffering muscular problems or varicose veins as a result. This foot movement also has the effect of altering people's posture enough that they avoid putting prolonged pressure on the same muscles and joints, thereby preventing muscle spasms, tension and pain.

With Jaymart's anti-fatigue matting your people will be kept fitter, healthier, motivated and more productive.

Unlike cold hard floors, anti-fatigue matting creates a comfortable and healthy working environment that helps to prevent against headaches, backache, stiff or swollen joints, muscular pain and simple fatigue; allowing people to concentrate for longer and reducing their chances of having an accident.

...and deliver

The result of all this is that people are happier, their energy levels are higher, they work better for longer and productivity is increased: it has, in fact, been shown that people who stand working up can reduce their levels of fatigue by up to 50% simply by standing on anti-fatigue matting.

Jaymart's anti-fatigue matting products all reduce the shock on joints when walking; some are even chemical and grease resistant, slip resistant even in wet conditions, resistant to static electricity, and whats more, with a great range of colours and styles that look good too.

So with Jaymart's anti-fatigue matting your people will be able to stand - & really deliver

**For more information on any aspect of
anti-fatigue and duckboard matting, please

DUCKBOARD MATTING

FLOORLINE

Canvas Green

FLOORLINE light duty matting is decorative, soft and hardwearing. Suitable for light industrial or commercial areas where slip resistance is required. Its open grid vinyl construction dissipates spillages and the matting is impervious to most liquids, acids and oils. Floorline's cushioned comfort and insulating properties not only provide respite from hard and cold floors but also reduces the risk of breakages of dropped items. Its open-grid light tubular construction makes the matting light and easy to install and relocate as necessary.

FLOORLINE PHOTO-LUMINESCENT

FLOORLINE PHOTO-LUMINESCENT is a specially manufactured version of Floorline, incorporating a photo-luminescent light emitting band to provide escape route and safety marking when lighting fails. Tested to DIN67510 Part 4 after glow properties (15.5/1.65 – 239/w-k).

Gauge
6mm

WIDTH: 60cm or 91cm
ROLL LENGTH: 10 metres long
COLOUR: Black with photo-luminescent strip

PILLOWMAT

White

Pillowmat is an all purpose cushion matting for use on working surfaces such as work benches and shelves for compartment lining. The hollow section of the matting is air filled to provide a lightweight and hygienic cushioning surface. It acts as a clean and noise-free covering which will resist contamination, absorb impact and reduce breakages. Pillowmat's open grid design facilitates drainage, resists oils, grease and chemicals & is easy to clean.

CROSSGRIP

CROSSGRIP roof walkway matting provides all weather safe access on flat roofs for maintenance of roof services. Crossgrip does not react with vinyl roofing membranes whilst providing continual protection to the roof's covering from pedestrian traffic. It is UV resistant, impervious to all weathers and, due to its open grid design, provides permanent slip resistance even in areas where water may pool. Crossgrip is lightweight and flexible enabling it to contour to bumps and ensuring quick and easy installation. The matting is maintenance free and its lifespan will equal or exceed that of modern flat roofing materials.

Gauge
14mm

WIDTH: 60cm, 91cm or 122cm
ROLL LENGTH: 10 metres long
COLOUR: Battleship Grey

FIRMGRIIP

Firmagrip is the ideal matting to provide a slip-resistant surface in areas where there is a high volume of pedestrian traffic or wheeled traffic activity. The matting is designed with a close mesh format which ensures stability, permits spillages to drain through but avoids fall through of small components. Classified R11, V10 Firmagrip is highly slip-resistant and suitable for wheeled traffic. Also resistant to oils and chemicals.
