

# CLIQ<sup>®</sup> Go

Access control at your fingertips

## Manage your security via the CLIQ® Go App Because your business is changing constantly

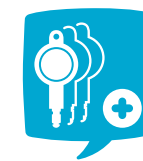

### Do you recognise this situation?

Managing a business today means that you will be away from your desk, more than sitting in your office. While you are away, security needs change: new staff join, keys are lost, access rights need to be changed.

The CLIQ® Go app moves security to a new dimension, enabling you to control security in your building from your mobile device.

Schedule access to your rooms, or give contractors time-limited access

As your business grows, you can expand the system without disruption at the door

If a key is lost, you can revoke access via the CLIQ® Go App

CLIQ® Go takes access control to the cloud, so you can manage your security anytime, anywhere

In a busy world, you need security systems that are flexible, leaving you to focus on growing your business

## It's so easy to manage lost keys ...

Lost keys are a serious security risk. With CLIQ® Go, you can revoke access rights anytime, anywhere

1 Your receptionist informs you about the lost key

2 You revoke the lost key in real-time with the CLIQ® Go App wherever you are

3 The receptionist programs a key to revoke access rights at the door

## ...and change access

Access needs can change very quickly, and you need to react fast. CLIQ® Go allows you to manage access in real-time

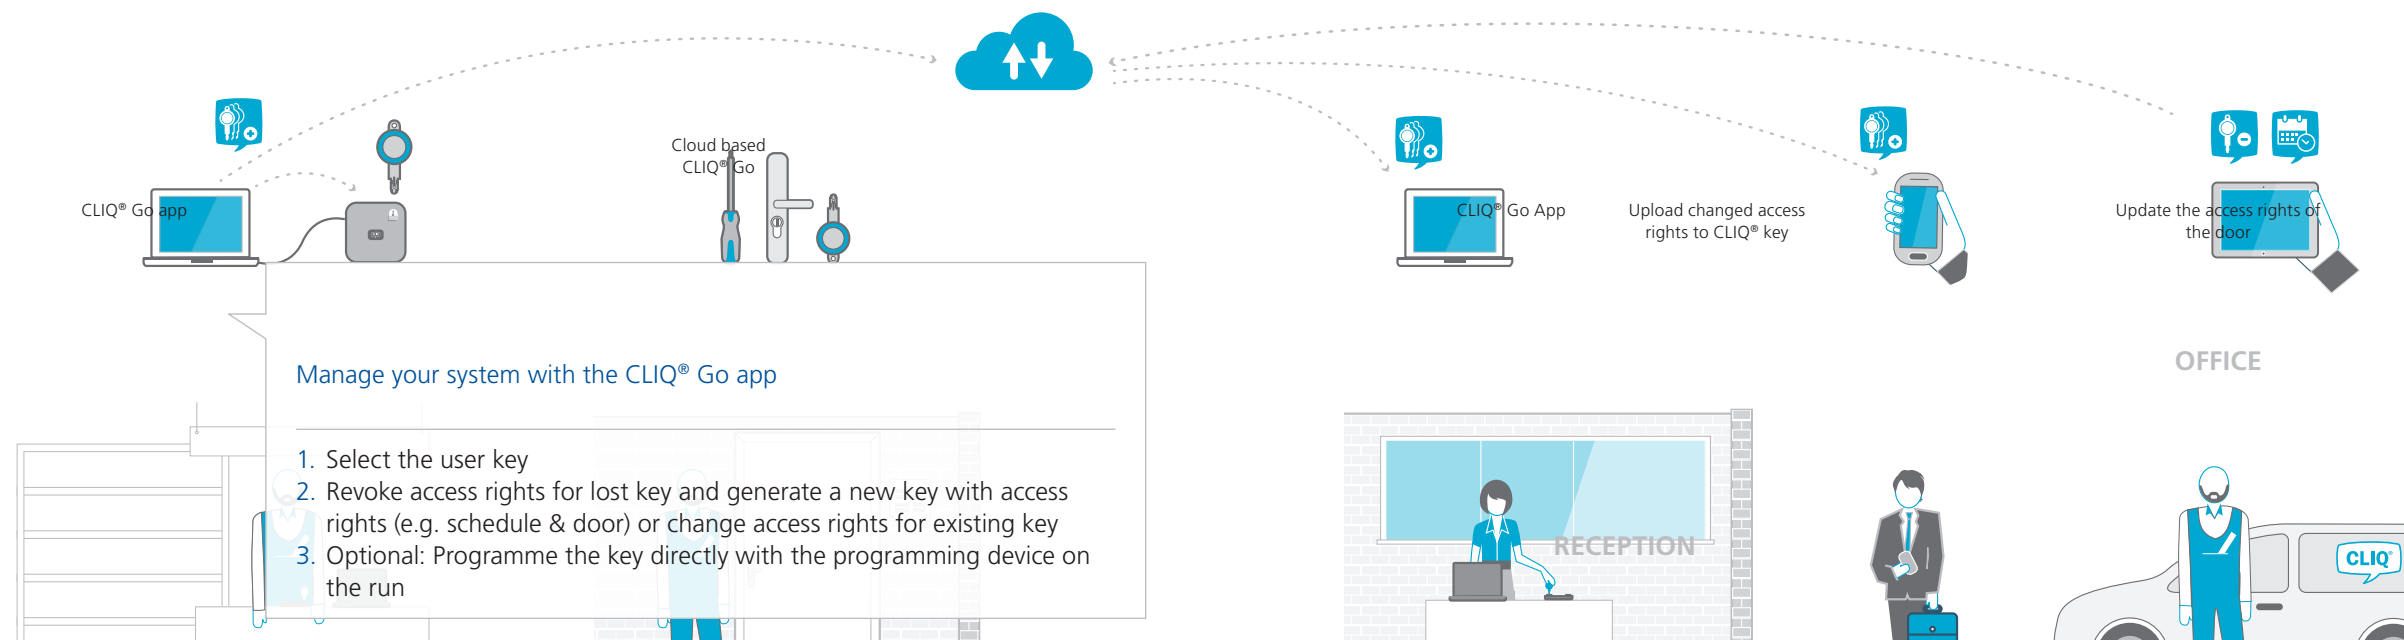

1 Your employee needs access to a new door and calls the manager

2 You change access rights of the key in real-time via the CLIQ® Go App, wherever you are. The employee then simply updates the key at the reception

3 Your employee is granted the access she needs, with minimal fuss

## How does it work?

## Businesses do not stand still

As your company grows, you need to know that your security system is flexible

## CLIQ® Go

The locking system that keeps your business on the move

1 Your locksmith receives your request for new keys and cylinders and he can deliver new components very quickly

2 He programs new cylinders and keys in his office. You can view updates via the CLIQ® Go App

3 Installation is quick with minimal disruption at the door

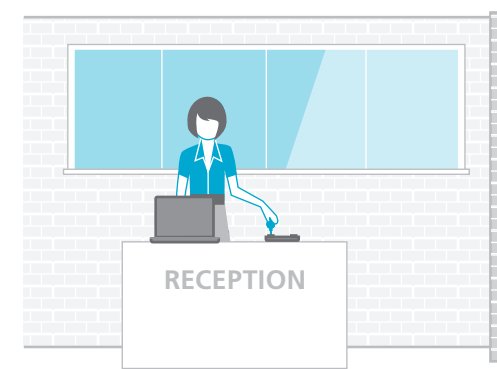

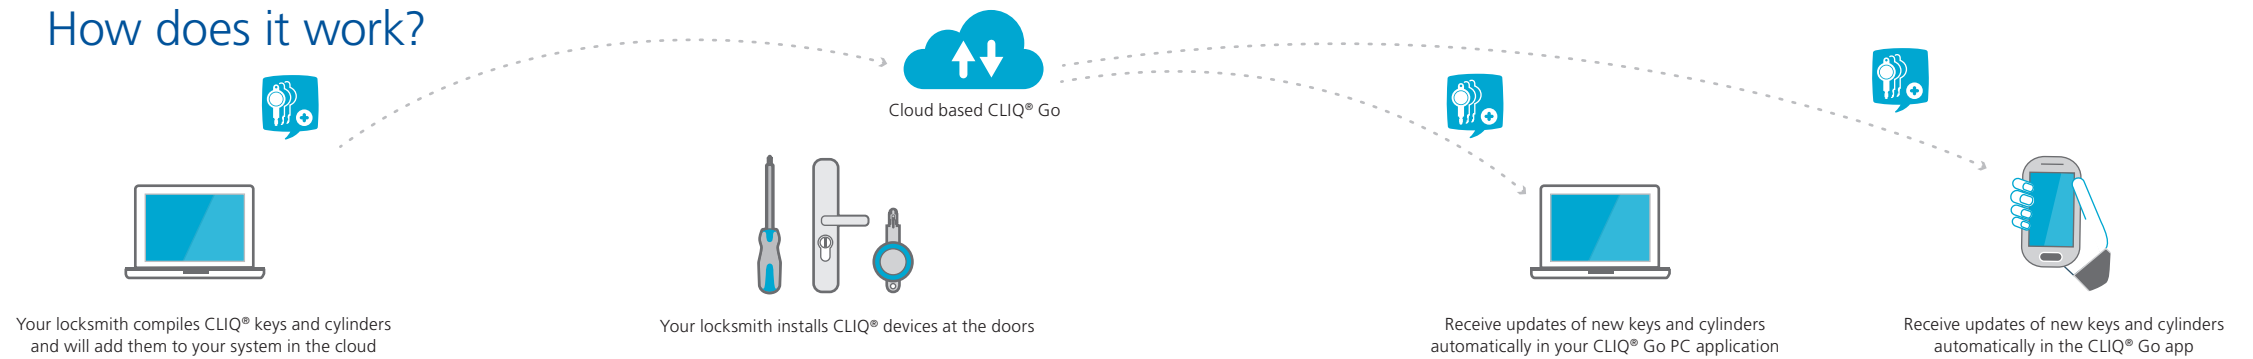

- High security CLIQ® cylinders for all door types, battery in the key, low maintenance, no cabling, long life time of 200.000 cycles

- CLIQ® programming devices for keys, available in desktop, wall or mobile versions

- The cloud-based system means that the CLIQ® Go app works seamlessly. As an option your locksmith can manage the system as a service

## How does it work?

## About Mul-T-Lock®
