ENHANCE
Integrated Digital Showering

Showering

For more information go to www.barbourproductsearch.info

Founded in 1875

The Nicholls and Clarke Group of Companies is a company dedicated to the manufacture and supply of the finest building materials. Extensive research allows each company within the group to develop aspirational and affordable products that meet the ever changing demands of todays design conscious consumer. Inspired by nature, culture and trends from around the world, we let our creativity shine in a wide and versatile assortment of tiles and bathrooms. Distinctive and highly original designs side by side with more conservative and traditional ones meet the challenge of everyones individual taste.

We use our 135 year pedigree and innovative technologies to develop our distinctive style; we do not work to a set formula, rather a combination of instinct and memory; we anticipate the future and remember the past.

ENHANCE Integrated Digital Showering

N&C's Enhance Range brings together an innovative and stylish collection of shower enclosures and wetroom panels with the advanced technology of the thermostatic digital shower to bring you the ultimate in showering pleasure.

This contemporary collection features the most popular shower enclosure styles and shapes for the UK bathroom with bi-fold, pivot and sliding doors. The walk-in panel with a deflector screen offers a unique solution and can be installed straight to floor or to a tray. The corner and linear wetroom panels are available with the option of a designer glass motif. Products in this range are available with the option of integrated digital showering.

The optional chrome plated Enhance digital shower is integrated into the corner profiles of products from the range to create a sleek minimalist look. The shower is ceiling fed with the processor stored out of sight in the loft for a quick and easy installation whilst ensuring perfectly blended water enters the bathroom. There is the option of operating the shower by a remote control which you can position outside the enclosure, up to 10 metres from the processor. To aid showering, the optional remote control and the shower control panel flash until the water reaches your desired pre-set temperature. This ensures the perfect showering experience every time. The Enhance valve is compatible with all approved UK plumbing systems - gravity fed with integral pump; and high pressure/combo boilers.

For true peace of mind all Enhance enclosures and wetroom panels are covered by a Lifetime Guarantee. The valve (controller and processor) is covered by a 5 year guarantee and the kit (handset and hose) is covered by a 2 year guarantee.

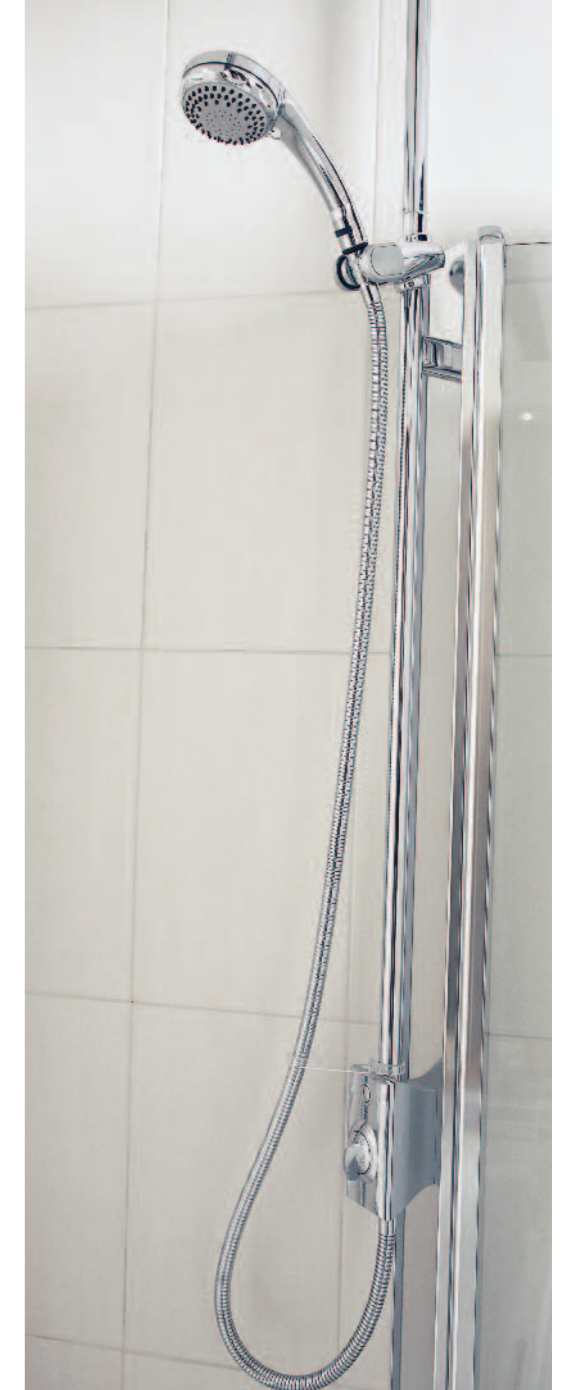

Integrated Digital Valve

A stunning and innovative addition to our Enhance range is the optional chrome plated Enhance Digital Valve. The Enhance valve can be integrated into the corner profiles of a selected range of products from the Enhance collection - to create a sleek minimalist look.

The valve is ceiling fed with the processor stored out of sight in the loft for a quick and easy installation, whilst ensuring perfectly blended water enters the bathroom. The Enhance valve is compatible with all approved UK plumbing systems - gravity fed with integral pump of high pressure/combo boiler versions.

"Intelligent showering"

"designed for ease of installation and the ultimate in showering style"

There is the option of operating the shower by a remote control which you can position outside the enclosure, up to 10 metres from the processor. To aid showering, the optional remote control and the shower control panel flash until the water reaches your desired pre-set temperature.

Code	Description
S61004.11	High pressure combination boiler system
S61004.12	Gravity system with integral pump
S61004.14	Digital dual switch

Features and Benefits:

- Precise, thermostatic digital technology
- Optional remote control
- Integrated with product via bespoke aluminium profile which clips onto the wall profile
- High pressure/combi and gravity specific systems eco flow mode
- Blended water is fed through the ceiling via shower riser rail
- **Dimensions:**
 - Tray to bottom of processor box - 900mm
 - Top of processor box to top of extension tube - 1440mm (can be trimmed as required)
 - Processor box - 140mm high
- Multi-function hand set
- Simple one touch operation
- Illuminated visual feedback on controls
- Stylish polished and satin chrome colour finish

Premier Shower Deck

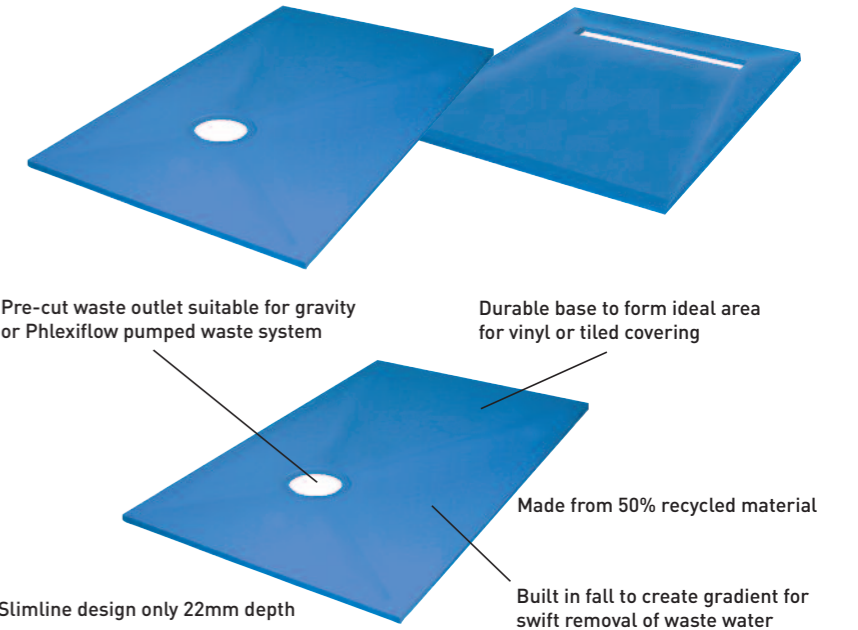

Suitable for a level access wet floor area

The Premier shower deck is the perfect solution for level access showering. The floor former can be installed in an existing concrete or timber floor. It has been designed with the waste outlet located to avoid joists in most circumstances.

Premier Deck floor formers are compatible with our Enhance, FreeSpace, Finesse & Pro-door shower enclosures.

Once installed the shower room can be tanked using the Nicobond Wet Room Tanking system in preparation for tiling. Alternatively vinyl flooring can be fitted.

The Premier Shower deck can be used either with a gravity gulley or the Phlexiflow pumped waste system. Circular or Tile grating can be used in the standard gulley version. The Linear gulley version is for the 800mm Phlexiline linear drainage system.

Consumer Guide

IMPORTANT PRODUCT DETAILS

- Enclosures and Screens carry a manufacturer's guarantee if products are installed according to the installation instructions - see guarantee criteria below.
- Any guarantee variations are indicated separately.
- All guarantee forms supplied with installation instructions must be completed and returned within 60 days to validate the lifetime guarantee otherwise only a statutory 12 month guarantee will apply.
- All Shower Screens and Enclosures are manufactured using toughened safety glass which complies to BSEN12150.
- It is important to note, that the glass must not be mounted or 'pinched' in such a way that would cause a stress point to develop in the glass. In addition, it must not be subjected to any sharp impact or severe temperature fluctuation which may also cause a stress point to develop in the glass.
- Toughened glass is physically and thermally significantly stronger than standard glass. However a significant impact (or stress as outlined above) can cause Toughened glass to break. In the event of breakage, toughened glass will break safely into small fragments in line with all relevant Standards.
- All aluminium profiles are extruded in accordance with BS6063 and BS1474.
- All heights quoted for Enclosures and Screens are from the top of the Shower Tray.
- All fixings are hidden on products.
- All fixings and pivot pins are manufactured from stainless steel - this adds great strength and durability to products.
- All seals and gaskets on products are manufactured from colourless PVC.
- The design rights of these products are owned and all rights reserved.
- All Shower Screens and Enclosures are tested in accordance with BSEN14428 - Shower Enclosures, functional requirements and test methods.

Truelife Lifetime Guarantee - Enhance range only

All Shower Enclosures and Bath Screens are guaranteed against faulty materials or manufacture for LIFE, provided they have been installed, used and maintained in accordance with our instructions. All product guarantees must be completed and returned within 60 days of purchase to validate the relevant guarantee. Failure to meet this deadline will result in a statutory 1 year guarantee on all products.

Should a claim arise, Customer Relations will investigate the issue. As part of this investigation we request that the following conditions be satisfied:

1. Proof of purchase at the time of the claim.
2. The guarantee applies to the original purchaser only and is non transferable.
3. The product has been fitted / installed in accordance with our fixing instructions, local bylaws and general good plumbing practice
4. The product has been maintained and cared for in accordance with our instructions (including regular and appropriate cleaning).

If in our opinion the product has been modified, misused, neglected, wilfully or accidentally damaged, we can accept no responsibility for failure.

Our representatives must be given the opportunity to inspect the product in the installed condition. Should any products included in the Lifetime guarantee be used for Commercial use i.e. leisure clubs, schools, hospitals, student accommodation, hotels or residential homes, only a 5 year guarantee will be applicable.

If in our opinion the product fails due to faulty materials or manufacture and that the conditions

above have been met we will arrange for a specialist Technical Sales Representative to repair or replace that item at our option.

We believe in continuous improvement. If in our opinion the product has failed under the terms of the Guarantee and a replacement is offered but identical goods are no longer available, we will replace it with our nearest equivalent product. For countries outside of the UK and Republic of Ireland, where a product has failed due to faulty materials or manufacture, a replacement product or product part will be offered only.

Should we carry out work as a result of a claim but subsequently it is revealed that the product has been abused or improperly installed, we reserve the right to charge the customer for the expense incurred.

The liability is limited to the product supplied by us and does not extend to consequential loss or damage arising from the defective product.

This Guarantee, which is effective for products purchased after February 1st 2006, states our entire liability and is offered to customers acquiring our products as consumers, not in the course of trade or business. Ex displays or products reinstalled from their original position are not covered under this guarantee.

Non glass or metallic parts (e.g. seals) are subject to normal wear and tear through usage and are therefore covered on all products for 1 year from installation.

This Guarantee does not affect your statutory rights.

This Guarantee is wholly applicable in the U.K. and Republic of Ireland - export conditions as indicated.

Please Note the Astro products feature a Ten Year Guarantee. All terms above apply for ten years.
