Hotel owner

Why continue to struggle with the expense and inconvenience of managing a system based on mechanical keys when the ideal solution is right at your fingertips?

SMARTair™ Guest is a cost effective access control system specifically designed to meet the needs of small hotels, guest houses and hostels.

Replacing room keys with a robust smartcard based wireless access control system makes sound business sense. While your guests will enjoy the convenience, flexibility and security of card based access, your business will benefit from cost and time savings through more streamlined and efficient administration.

SMARTair™ Guest
Good for your business — great for your guests

Entering the room

Guest experience

Designed for hotels, hostels and guest houses, SMARTair™ Guest is the ideal access control system for smaller premises.

1 The SMARTair™ Guest software allows managers to easily administer the system for quick and efficient check-in and check-out.

2 When guests arrive, they are issued a smartcard programmed with dates of their stay. For added convenience, a separate card can be issued to each occupant of the room.

3 No more messing about with room keys, the smartcard provides quick and easy room access. SMARTair™ Guest provides the peace of mind that comes with a secure, user-friendly way to lock rooms.

4 Guests insert their cards into the energy saving device mounted on the guest room walls to activate the power in the room. When they leave the room, they remove the card, and the device shuts down the lights and power to the room.

5 The individual smartcards can also be used in conjunction with a room safe.

6 SMARTair™ Guest provides guests with added convenience and security.

7 Easy to use and easy to carry, the smartcards can also be programmed to provide out-of-hours access to buildings, when reception is closed.

» With just one smartcard, I can open my room and the safe. It's so convenient. «

SMARTair™ Guest
Convenience

SMARTair™ Guest is a flexible, wireless application that provides the convenience and peace of mind that comes with a secure, user-friendly way to lock rooms. A straightforward step up from mechanical keys, the SMARTair™ Guest product portfolio was developed specifically for small accommodation businesses. It includes cylinders and escutcheons for room doors, an energy saving device for mounting on guest room walls and a safe run from the same programmable smartcard.
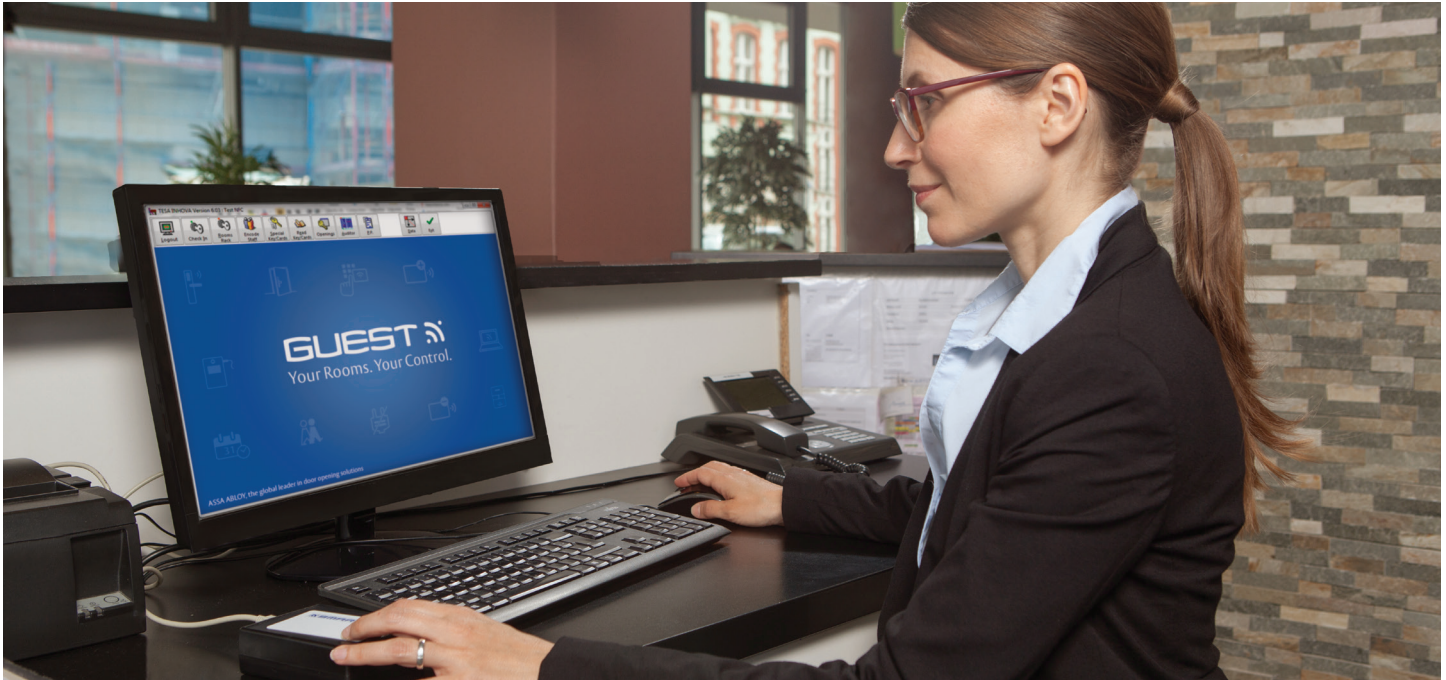

SMARTair™ Guest
Security

Everyone who runs a small hotel, guest house or hostel is familiar with the problem of lost keys. It's not only an annoying waste of time, but also an expensive and unnecessary cost to the business. SMARTair™ Guest is a flexible, cost effective way to bring guest security into the 21st century replacing keys with a smartcard system designed to save both time and money.

SMARTair™ Guest is more than the latest wireless technology, the hardware is backed by clever software that allows hotel managers to easily administer their smartcard system and handle check-in and check-out procedures. If a room card gets lost, a new card can be generated by the system software and programmed using the encoder. There's no need to change the locks or waste time and money getting new keys cut.
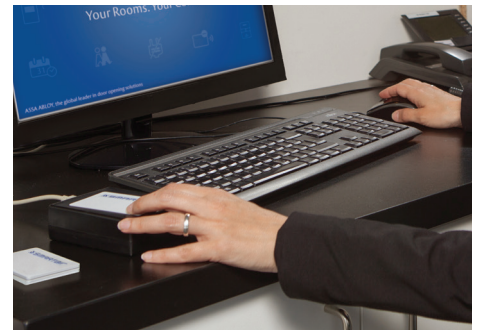

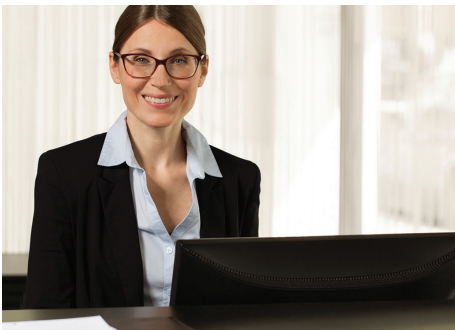

» I lost my room card when I was out in the city. When I got back to the hostel they issued a new one straight away – what a great service. «
Guest

It's so easy to manage the SMARTair™ Guest system
Main features at a glance

1 Guest check-in/ check-out

· User friendly software for easy check-in, check-out
· Cards easily managed via SMARTair™ Guest software or from existing property management system
· Cards programmed with number of nights/expiry date
· After expiry date, card ceases to be valid
· Each new card issued is like a new room key
· Guests can be issued their own individual smartcard

2 Lost cards, extended stays, cancelled nights

· A new card can be issued which automatically cancels the lost card
· For extended stays, cards can be programmed with new dates
· If a guest has to leave early, the card is automatically cancelled at check-out

3 Managing access rights and receiving audit trails

· Managers can programme the cards to allow access to certain areas
· Cards can be used to access common areas
· Cards can be programmed to open the entrance door during off hours
· The audit trail provides complete visibility, showing who has entered and when
· Allows control of staff working at the hotel

SMARTair™ Guest adapts to any building type.
The modular system can be integrated into your existing doors and room environment.

SMARTair™ Guest software
No special IT skills required. SMARTair™ Guest software allows managers to easily administer the system, reprogramme cards, and check guests in and out.

SMARTair™ Guest cards
Designed for hotels, hostels and guest houses, the wireless access control system is based on smartcards.

SMARTair™ Guest Room devices
An energy saving device for mounting on guest room walls, and a safe offering increased security and convenience for guests.

SMARTair™ Guest Door devices

Escutcheons and cylinders with integrated smartcard reader for interior and exterior doors are battery-powered and wireless for easy installation. They are available in a variety of finishes and designs. The wall reader brings access control security to main entrance doors.
