

Case History: One New Change

Product Focus

The Air Fury
Recessed Hand Dryer

- The Air Fury R1 is unique to Lovair in that it can be recessed into the wall.
- It features a low energy, high speed motor, and a rapid drying time of around 15 seconds.
- With a combination of these factors the R1 is typically 95% cheaper to run than paper towels and 70% cheaper to run than conventional hand dryers.
- Finally, the R1 has a modern, stylish aesthetic which blends into any washroom design.

Case History - Washroom

One New Change

One New Change, with three floors of retail and four floors of offices is a large, iconic, central London development.

It occupies an entire city block; the Cheapside elevation is more than one hundred metres long.

Lovair worked with the delivery architect, Sidell Gibson, supplying the Recessed Air Fury R1 Hand Dryer to washrooms across the scheme.

The washrooms were designed to be both stylish and durable, as some areas are open to public use.

The finished project looks impressive and we expect the hand dryers to perform for many years to come.

| Project Team | |
|---------------------------|----------------------|
| Concept Architect | Ateliers Jean Nouvel |
| Delivery Architect | Sidell Gibson |
| Construction Manager | Bovis Lend Lease |
